Preface

The 59th Annual Meeting of the Congress of Neurological Surgeons was held in New Orleans, Louisiana, from October 24-29, 2009. Volume 57 of *Clinical Neurosurgery* represents the official compilation of the invited scientific manuscripts from the plenary sessions, The Presidential Address by Dr David Adelson, and biographic and bibliographic information of the Honored Guest, Dr James T. Rutka.

Dr Nathan Selden, Annual Meeting Chairman, and Drs Ali Rezai and Russell Lonser, Scientific Program Chair and Vice Chair respectively, organized a superb meeting which was very well attended with more than 2800 medical attendees. The theme of this year's Annual Meeting, *A Culture of Excellence*, exemplified how neurosurgeons define, pursue, and measure excellence in their everyday practice and specialty. Dr David Adelson delivered his inspirational Presidential Address entitled, "Neurosurgery: A Culture of Excellence," and talked about the concept of "excellence." This meeting was also a joint meeting with our neurosurgical colleagues from the Neurological Society of India (NSI) and the American Association of South Asian Neurosurgeons (AASAN).

Honored Guest, Dr James T. Rutka, Professor and Chairman of Neurosurgery at the University of Toronto, gave three scholarly addresses discussing his philosophy about "excellence" in neurosurgery program building and how to enhance the academic mission, "excellence" in clinical neurosurgery using epilepsy surgery as an example, and "excellence" in neurosurgical research using neuro-oncology as a paradigm. Dr Rutka's final quote continues to resonate in our ears: "great surgeons are not born, rather they are made by a commitment or willingness to pay the price for excellence."

It has been my honor and privilege to serve as Editor of *Clinical Neurosurgery* over the last few years. We thank Dr Nelson Oyesiku, Editor-in-Chief of *NEUROSURGERY®*, for his unrelent support and advice. We also thank Michele Lengerman and Laurie Behnke from the CNS Headquarters Office for their dedication, tireless energy, and hard work throughout the year as well as Christine Pruitt-Plasterer at Wolters Kluwer Health, Lippincott Williams and Wilkins for her patience and commitment to *Clinical Neurosurgery*.

We welcome Dr Gerald Rodts, Jr, as the new President of the Congress of Neurological Surgeons and look forward to seeing you all in San Francisco.

JAMES T. RUTKA

Honored Guest
James T. Rutka, MD, PhD, FRCSC, FACS, FAAP

Born in Toronto, and educated at Princeton University (1975-1977) and Queen's University Medical School (1977-1981), James T. Rutka, MD, PhD, FRCSC, FACS, FAAP, interned at McGill University (1981-1982) before entering the University of Toronto Neurosurgery Training Program in 1982. His training included a research fellowship at the Brain Tumor Research Center, the University of California San Francisco where he obtained his PhD in Experimental Pathology (1984-1987). Upon conclusion of his neurosurgical residency in 1989, Dr Rutka did a clinical fellowship in microvascular neurosurgery with Dr Kenichiro Sugita at the University of Nagoya, and a post-doctoral research fellowship in molecular immunology at Juntendo University, Tokyo (1990).

Dr Rutka assumed his appointment in the Department of Surgery, Division of Neurosurgery in 1990, and has been on the surgical staff at the Hospital for Sick Children in the Division of Pediatric Neurosurgery since that time. Dr Rutka's primary research and clinical interests relate to the science and surgery of human brain tumors. His laboratory interests lie in the molecular biology of human brain tumors - specifically in the determination of the mechanisms by which brain tumors grow and invade. His recent clinical interests have centered on the surgical treatment of epilepsy in children. He has over 250 peer-reviewed publications. His laboratory has been continually funded with grants from the CIHR, NCIC, OICR and the Pediatric Brain Tumor Foundation (since 1992). He is on the editorial boards of the *Journal of Neurosurgery*, *NEUROSURGERY®*, the *Journal of Neuro-Oncology* and *Neuro-Oncology*.

Dr Rutka was appointed as Co-Director of the Arthur and Sonia Labatt Brain Tumor Research Centre at the University of Toronto in 1998. In 1999, he received a Scientist Award from the Medical Research Council of Canada. That same year, Dr Rutka was promoted to Professor in the Department of Surgery, and was appointed Chairman of the Division of Neurosurgery at the University of Toronto. He currently holds the Dan Family Chair in Neurosurgery. In 2001, Dr Rutka received the Lister Award in the Department of Neurosurgery for sustained contributions to surgical research at the University of Toronto. In 2002, Dr Rutka was listed by Globe and Mail as one of the Nation Builders in Canada, in the section of Science and Technology. In 2004, he was honored with the Grass Award from the Society of Neurological Surgeons. In 2005, he received the Farber Award from the AANS/CNS Section on Tumors for longstanding contributions to neuro-oncology research. In 2006, Dr Rutka was appointed to the position of Secretary of the American Association of Neurological Surgeons and was awarded the International Order of Smile, an award which honors individuals for their love, care and aid of children.
