Tumor Complications Course

January 15-16, 2022
Fort Lauderdale, Florida

Course Description

This course provides a peer review forum for the discussion of complications related to brain tumor surgery. Clinical decisions, operative techniques, and equipment-related issues will be discussed in order to pass along lessons learned, point out safety concerns, and improve the surgical management of patients with brain tumors. The impact of complications on patients and surgeon's well being will also be addressed.

Learning Objectives

Upon completion of this course, attendees will be able to:

- Recognize factors that lead to complications and poor outcomes when treating brain tumors
- Discuss strategies for complication avoidance and management
- Identify the impact of complications on patient quality of life
- Discuss how complications impact physician wellness
